(pre-conference event at the annual conference)

San Diego, California
DECEMBER 5

The flexibility of design-build project delivery allows an Owner to choose among various approaches for procurement and contracting. In progressive design-build (PDB) the Owner “progresses” towards a design and contract price with the team, making it an increasingly popular delivery option. Using real-world case studies of exceptional outcomes, taught by some of the nation's most experienced PDB Owners and practitioners, this course will help participants:

- **Gain insight** into the flexibility of design-build project delivery and the trade-offs, key considerations and opportunities of the various procurement approaches.
- Understand how **Design-Build Done Right®** best practices and principles apply to Progressive Design-Build (PDB).
- Take a **deep dive into PDB**, including a close look at what it means, key characteristics and how to determine if PDB is right for a project.
- **Learn key elements** of successful procurement, contracting and post-award execution for PDB.

**DBIA IS YOUR SOURCE FOR THE ONLY PROGRESSIVE DESIGN-BUILD
DONE RIGHT™ EDUCATION COURSES IN THE NATION.**

Visit dbia.org/courses for more details and to register.

SPACE IS LIMITED AT EACH OFFERING SO REGISTER EARLY.
