

DBIA-WPR LA/OC CHAPTER BREAKFAST PROGRAM PROGRESSIVE DESIGN-BUILD

- Progressive Design-Build facilitates the involvement of the design-build team during the earliest stages of the owner's project development, ensuring they are part of the project team developing design solutions. This promotes the greatest amount of collaboration between the three key players in a construction contract: the owner, the designer and the contractor.
- FMI confirmed recently that Design-Build is still growing as a project delivery method. Today, Progressive Design-Build is a preferred method of design-build delivery for its improved integration and communication for the project team, more scope flexibility, and increased control over costs as the project develops.
- Progressive Design-Build reduces the owner's procurement time/cost, increases the influence the owner has on design, improves overall speed to market, and attracts the best teams.
- Come to hear challenges the teams are facing at the earliest stages and solutions, from owner / architect / contractor perspective, and how you can best position your team to win a Progressive Design-Build project.

Tuesday, February 26, 2019 at 7:30am BREAKFAST PROGRAM Courtyard Irvine Spectrum
