

SACRAMENTO CHAPTER LUNCH PROGRAM

PREFABRICATION AND MODULAR CONSTRUCTION PANEL

Increasing construction costs, quality expectations, and schedule demands are accelerating the adoption of Prefabrication and Modular Construction, changing the economics of the industry and design and construction companies along with it. Be part of an interactive conversation with panelists on the front lines in our region.

Thursday, March 28, 2019 at 11:30am

SACRAMENTO LUNCH PROGRAM

Doubletree Hotel, Sacramento

SPEAKER PANEL

Noel Manerud, Project Manager, HKS ARCHITECTS

Noel Manerud has 25 years of professional experience in architecture and contracting. He provides oversight of design and technical consultants and has managed large project teams. He offers expertise in Lean and Integrated Project Delivery best practices, such as comprehensive pull scheduling, collaborative schematic and design development and documentation, and BIM. He works directly with design and planning building commission boards and agency reviews. Noel's variety of project experience includes commercial, office, residential and institutional buildings ranging from \$10 to \$300 million. He also has experience in complex civil and landscape projects, including land restoration.

Zach Murphy, CEO, DIGITAL BUILDING COMPONENTS

Zach Murphy has over 20 years of experience in technical building. Prior to Digital Building, Zach executed large healthcare and office campus projects for DPR Construction, leveraging off-site fabrication and Virtual Design and Construction (VDC) as a key planning tool. These projects achieved a level of quality unattainable through conventional means and recognized a reduced margin of error associated with cost and schedule. Zach is a digital fabrication evangelist; his experience has demonstrated that the best way to see cost, speed, and quality benefits, while achieving the customer's bespoke architecture, is to resolve the design in the computer model, fabricate digitally, and leverage digital technology in the field for installation.

Erik Winje, Preconstruction Manager, CLARK-PACIFIC

Erik Winje is the Pre-Construction Manager of Clark Pacific's General Contracting Division. A registered professional civil engineer, Erik has worked in the construction industry for over 39 years in both preconstruction and operations. Erik's knowledge of estimating, scheduling, constructability reviews, subcontract negotiation and administration brings added value to projects. In the last 8 years of his career has been involved in integrated project delivery and Design-Build work. Recently he acted as the design manager for design build projects in the greater Sacramento area completing three LEED projects. Erik is active in the Lean Construction Institute and DBIA working to transform the way in which projects are designed and built.

SPONSORSHIP OPPORTUNITIES

Title Sponsor	\$2,500.00
Includes table of 10 (7 sponsor attendees + 3 speakers at table), company recognition, option to display pop-up banner or board at event, opportunity to provide event moderator/introducer
