

DBIA-WPR WATER/WASTEWATER WEBINAR

IMPROVING DESIGN-BUILD IN WATER AND WASTEWATER

Join **DBIA-WPR** for a regional webinar on water and wastewater design-build. Public agencies have a long history embracing design-build to improve collaboration and innovation. A new committee in the Western Pacific Region includes a group of project owners that have been discussing how to improve design-build collaboration, education and competition in the water and wastewater industry. Join this special webinar to provide input to project owners in this interactive panel discussion. The panelist will provide an overview of their selection methods and upcoming contract opportunities in design-build.
