

# DBIA-WPR ARIZONA CHAPTER LUNCHEON: VDC BEST PRACTICES FOR DESIGN-BUILD

Join DBIA-WPR Arizona Chapter for in-person lunch program focused on VDC. Building Information Modeling (BIM) is a tool or the model-based technologies that produce a building information model that enables a highly collaborative Virtual Design & Construction (VDC) process throughout a project's lifecycle. When combined, project teams can take advantage of a forward-thinking environment where the integration of people, process and technology can thrive. The whole team approach inherent in Design-Build is an ideal environment for BIM/VDC to flourish. In addition to highlighting DBIA's approach to VDC Done Right we'll also hear from innovative VDC Leaders who will provide real-world examples of how VDC is driving value by enabling the merging of technology and project delivery to provide optimized outcomes for Owners.
