

# DBIA-WPR BAY CHAPTER LUNCH: LEVERAGING VDC FOR DESIGN-BUILD

Join DBIA-WPR Bay Chapter for in-person lunch program focused on VDC. Building Information Modeling (BIM) is a tool or the model-based technologies that produce a building information model that enables a highly collaborative Virtual Design & Construction (VDC) process throughout a project's lifecycle. When combined, project teams can take advantage of a forward-thinking environment where the integration of people, process and technology can thrive. The whole team approach inherent in Design-Build is an ideal environment for BIM/VDC to flourish (more than any other project delivery system), especially when you can take advantage of an integrated project team from the outset, creating a platform for success, where all the client's goals can be embraced early. In addition to highlighting DBIA's approach to VDC Done Right we'll also hear from innovative VDC Leaders who will provide real-world examples of how VDC is driving value by enabling the merging of technology and project delivery to provide optimized outcomes for Owners. Box lunch will be provided.
