

Eric Speik is a Project Director with McCarthy Building Companies. He leads major key projects in Southern California and specializes in both higher education and collaborative delivery. As the project manager for this ground-breaking facility, he was responsible for the design management, preconstruction coordination, and construction of this highly complex project. He was also responsible for the overall project performance, serving as the primary conduit of information for the McCarthy project team, owner, trade partners, and design professionals.

Tim M. Stevens, AIA LEED AP leads SCB San Francisco's Campus Environments practice. With over 30 years of campus design experience, he provides nationally recognized expertise in facility design, programming, and planning for student life. Tim's work addresses many of the challenges facing colleges and universities— designing for student success and overall wellbeing; inherent flexibility and mixing of programmatic uses; diverse funding and delivery models; and environmental sustainability. Tim has designed more than 25,000 beds of student housing – including 4,000+ at UC Riverside!

Evan Jansen, M.B.A. DBIA., is Director of Project Controls with Azimuth Zero, Inc. in Los Angeles, Calif. He has more than 40 years of experience in university student housing operations, and in owner-side advisory in design-build services procurement, contracting, and design and construction project management. He is recognized as a subject matter expert in design-build delivery and has assisted numerous clients in delivering over 75 design build projects including a number of housing projects totaling more than 6,000 beds over the last twenty-five years.

Jaqueline Norman stewards the physical development of the UCR campus in support of its teaching, research, and public service mission. She is responsible for long range planning, new construction, renovation of existing campus facilities, open space, and infrastructure. Her dedication to the long-range vision of the campus over the last 16 years has resulted in innumerable projects and developments exceeding \$1.6 billion dollars.
